

## **Certified in Public Health Job Task Analysis**

**June 24, 2022**

### ***Overview***

The [National Board of Public Health Examiners](#) (NBPHE) is conducting a worldwide ["We are Public Health" job task analysis survey](#). This survey is being done to meet two important goals: to conduct a study of the most common functions of the public health workforce on a region-by-region basis across the globe and to update the content outline of the [Certified in Public Health \(CPH\) exam](#). During this [Council on Linkages Between Academia and Public Health Practice](#) meeting, Allison Foster, MBA, CAE, President, NBPHE, will discuss the job task analysis and opportunities to get involved.
